## Work History

---

APR 2020 - PRESENT **Freelance Web Developer**

JAN 2018 - APR 2020 **RigMinder / Ensign Energy Services**

- Working in React acted as one of the primary developers of the RigMinder portal which provided users with PDFs, KPIs, Rig monitoring, and scheduling solutions.
- Transitioned legacy back end from PHP to Golang
- Implemented a user creation page on web portal that eliminated the need for users to receive continuous support for account creation and automated tasks for development team.
- Utilized canvas and partnering company's data API to create heat map visualization of fracking information to aid drill guidance

MAR 2015 - JUN 2016 **Jeung Sang Language School**

- TEFL Teacher in Suwon, South Korea
- Taught English to students ages 6-15

---

## EDUCATION

---

SPRING 2010 **University of California, Irvine**

International Studies, B.S.

---

**Fire Chief Squirtle** [http://www.stephenloquet.com/Fire\\_Chief\\_Squirtle](http://www.stephenloquet.com/Fire_Chief_Squirtle)

Sole contributor to browser game inspired by classic console video games

- Constructed using vanilla JavaScript and HTML Canvas
- Backend built with node.js and serves responses from a Mongo database

---

## PROJECTS

---

**BetterBooks** <https://github.com/Sloq/BetterBooks>

Built an interactive website, in the style of Goodreads, that tracks users' favorite books and allows creation of bookshelves to organize users' libraries

- Single-page React/Redux app utilizing Ruby on Rails backend
- Implemented user authentication using BCrypt and established session validation

---
